

The no calling list should be kept as it has been since it's existence. The citizens of WI have the right to privacy and this should include our own homes. People wanting to challenge this list do NOT respect or value the time of the people on the list. It has been made aparent by the people that have added their names to the list that they are wanting their time to be protected by this list! The people that are trying to contest this list - are doing it only for their own interests. It will save them time and money if they are able to simply call the people they wish to contact - rather than mail them the information they are wishing to get to these people. The people's voice and interests needs to be valued and respected. The no call list needs to be respected and protected - the people have spoken!
